RE: M/039/0013, B&C Limestone Quarry  
SITLA Permits/Leases ML51303-MP/ML50575-OBA/ML48949-OBA

Dear Ms. Dean:

Upon advice from legal counsel I am writing to advise the Division that Bryce Haas, permittee/lessee under the above numbered expired trust lands mineral permits/leases, has no valid existing right to enter upon the trust lands within DOGM permit M/039/0013 for any purpose, including the performance of reclamation or the removal of any equipment or personal property left upon the lands by Mr. Haas. All rights of entry by Mr. Haas were terminated upon expiration of the SITLA permits/leases and extensions granted thereof, and any personal property or equipment or stockpiles or quarried rock remaining upon the trust lands considered abandoned and are forfeited to the Trust Lands Administration. Entry upon the subject trust lands by Mr. Haas to perform reclamation work or to remove anything whatsoever from the lands shall be considered a trespass of state trust lands.

The Trust Lands Administration has repeatedly given Mr. Haas every opportunity to reclaim the mined trust lands that are within M/039/0013 and in each instance he has failed to follow thru with his commitments to complete the reclamation. As stated in my letter of August 20, 2009, to Mr. Paul Baker, Minerals Reclamation Program Manager, the Trust Lands Administration requests that the Board of Oil, Gas & Mining order forfeiture of the reclamation bond for M/039/0013 and that the Division use the bond money to contract a qualified entity to perform the reclamation work.

Please contact me if the Trust Lands Administration may be of any assistance to your agency in accomplishing these actions.

Sincerely,

John T. Blake  
Trust Land Specialist
